

# List of Tables

Table 1	Rotation Direction of Tablet Presses .....	10
Table 2	Maximum Tablet Sizes for Standard Dies .....	36
Table 3	Standard Clearances for Normal Application of Round Tooling .....	37
Table 4	Available Key Space and Maximum Stem Lengths .....	40
Table 5	Interchangeable Tooling for Rotary Tablet Presses: 3/4" Punch Barrel and 0.945" Die .....	41
Table 6	Interchangeable Tooling for Rotary Tablet Presses: 3/4" Punch Barrel and 1.1875" Die .....	42
Table 7	Interchangeable Tooling for Rotary Tablet Presses: 1" Punch Barrel and 1.500" Die .....	43
Table 8	Tooling Dimensions for Special Rotary Tablet Presses .....	44
Table 9	Standard Bisect Specifications .....	70
Table 10	Punch Tip Tabulations .....	71
Table 11	Minimum Land Widths .....	73
Table 12	Chemical Composition of Tool Steels .....	79
Table 13	Typical Hardness Readings for Tool Steels .....	81
Table 14	Function(s) of Common Steel Coatings .....	82
Table 15	Comparison of Steel Coating Processes .....	82
Table 16	Engineering Requirements for Tablet Punch Coatings .....	83
Table 17	Punch Cup Compression Forces for TSM Round Tooling .....	85
Table 18	Punch Cup Pressure Ratings Versus Shape Factors .....	87
Table 19	Punch Cup Force Ratings Versus Cup Depth for 30° F.F.B.E. Tooling .....	89
Table 20	Polishing Compounds and Tools .....	107
Table 21	Production Problems with Tablet Quality .....	116
Table 22	Production Problems with Tooling .....	122
